## Config File Changes

This document describes the configuration file changes that have been implemented between Web Forms for Marketers 2.5 rev. 141014 and Web Forms for Marketers 8.0 rev. 141217.

This release requires you to make changes to the following files:

- /App\_Config/Sitecore.Forms.MVC.config

### Changes to Web.config

The following changes have been implemented in the `web.config` file of Sitecore XP 8.0 rev. 141212 (Initial release) to support Web Forms for Marketers 8.0 rev. 141217 functionality:

Add the new handlers to the `<system.webServer><handlers>` section:

```
<add name="CaptchaImage" verb="*" path="CaptchaImage.axd"
type="Sitecore.Form.Core.Pipeline.RequestProcessor.CaptchaResolver, Sitecore.Forms.Core" />
```

```
<add name="CaptchaAudio" verb="*" path="CaptchaAudio.axd"
type="Sitecore.Form.Core.Pipeline.RequestProcessor.CaptchaResolver, Sitecore.Forms.Core" />
```
